**Uploading Photo's Into Section 10 Of Your Profile**

The photos in section 10 are your selling point. They will be used by productions to choose who they wish to book. It is in your best interest to ensure good quality photos are uploaded to give yourself the best chance of being picked.

If you have your own professional photo's, please use them, however, we need a realistic representation of you (as you look day to day), and we do not expect you to invest in pro shots if you don't wish to. If you take the time to take photo's specifically for the purpose of your Phoenix profile, you should be able to achieve the required style.

You will need to upload in .JPG format.

1. If you attend a Phoenix photo session your photos will look like this.

2. If you are uploading your own photos it is best to emulate the above as much as possible.

3. If you cannot emulate a Phoenix photo session photo, there are still other ways of getting a good photo.

Please consider the following when taking/uploading shots;

- Take the time to take photo's specifically for your Phoenix profile
- Show your face in clear bright light
- Make sure the photos are IN COLOUR
- Have a PLAIN background if possible (white or grey are ideal), or if not a 'back drop' of some kind looking professional in style
- If you have long hair, wear it down so that we can see the length.
- Please smile in one of your shots if possible - we need to see your teeth
- Avoid wearing Black if possible
- Avoid wearing baggy clothing/high necks - we need to see your body shape!
- Please wear clothing! You can upload underwear shots, if you so wish, to the media section of your profile but they're not suitable as your MAIN photos.

We cannot accept photos that;

- Don't show you close up and clearly
- That are not current (i.e. taken more than a year ago)
- Have other people in them
- Are from another agency
- Are filtered
- Selfies

We cannot accept photos similar to the following examples.
